Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Botium Toys needs to strengthen its security by putting several important protections in place. These include giving employees only the access they need to do their jobs (least privilege), creating disaster recovery plans, enforcing strong password policies, separating job responsibilities, using an intrusion detection system (IDS), maintaining older systems, encrypting sensitive data, and using a password management system. To improve compliance and better protect sensitive information, the company should also focus on least privilege, separation of duties, and encryption. In addition, Botium Toys should classify its assets so it can better understand what needs protection and determine whether additional security controls are required. These steps will help reduce security risks and improve the overall security of the organization.
